Dear Doctor:

Autumn -- a time of harvest and holidays, but not for the patient with moderate depression and anxiety.

Typical presenting symptoms are somatic complaints such as insomnia, headache and GI distress. You'll see improvement in the first week and the weeks that follow with Limbitrol® (5 mg chlordiazepoxide and 12.5 mg amitriptyline HCl/Roche) or Limbitrol® DS (10 mg chlordiazepoxide and 25 mg amitriptyline HCl/Roche) CIV.

As the enclosed brochure indicates, almost 3 out of 4 patients selected for clinical study got relief of insomnia following the first h.s. dose. With Limbitrol you can generally expect overall improvement soon enough to let your patient derive some pleasure from the traditional fall season.

Remember to caution your patients about the combined effects of Limbitrol with alcohol and other CNS depressants as well as
